Subject: References for Massachusetts Compliance

Per our Friday meeting, I have assembled all references listed in Appendix 2, with the exception of the Federal Register reference for nicotine in smokeless tobacco which Betty already has. Copies of all other references, as well as PTL's procedure for tobacco weight, have been mailed to Betty.

One correction: Appendix 2 references ISO 7201, 2nd edition, 1997, "Routine Analytical Smoking Machine Additional Test Methods." **The number of this procedure should be ISO 7210.**
